Subject: Attorney Client Privilege: Rhone Poulenc and LDW timelines

To summarize our discussion:

LDWG design for upper reach is starting. RP property is in upper reach. ROD

<https://semspub.epa.gov/work/10/715975.pdf> Fig 18 shows part of RP intertidal area likely to require dredging, based on RI/FS dataset.

Questions:

1. (b)(5) attorney-client

2.

3.

4.

5.

6.

(b)(5) attorney-client

(b)(5) attorney-client LDWG and RP will be talking at some point, as LDWG will need access to RP property for sampling.

We can let them talk, or encourage them to talk, or ask them to include us. It's up to them, as long as the work is coordinated and there's neither gaps (that could delay implementation) or waste (well, I don't care if they duplicate efforts, but harmonious coordination is better).
